COURSEWORK

COURSERA
Introduction to Generative AI
Python of Data Science
Data Science Toolkit

UNDERGRADUATE
Data Structures and Algorithms
Operating Systems
Database Management System
Software Design & Engineering
Object Oriented Programming
Linux Programming

MOOCS CERTIFICATION
Data Science Methodology by IBM
Data Structure and Algorithm

SKILLS

PROGRAMMING
Python • JavaScript • TypeScript • Java •Soldity

FRAMEWORK
Nextjs• React• Redux• Django

WEB TECHNOLOGIES
HTML• CSS• JavaScript • Tailwind

DATABASE
SQL• MongoDB

OTHERS
Nodejs • Hardhat •Shell Script
.

INTEREST

Reading • Trading
Games • Problem solving

STATEMENT

Skilled software engineer with 2+ years of experience in full-stack development. Proven ability to deliver impactful solutions using JavaScript, Node.js, TypeScript, and Solidity. Expertise in Next.js front-end and UI development, with a keen understanding of responsive design and software engineering.

EXPERIENCE

NIMBLEBOX.AI, CHENNAI | Frontend Engineer Intern
Feb 2023 - Aug 2023
- Collaborated on the development of frontend components for AI-driven applications.
- Participated in the design and implementation of user interfaces using React, Redux, and Next.js.
- Gained hands-on experience in the Agile development process.

THE TAN MAN GAADI, BANGALORE | Full Stack Engineer Intern
Sep 2022 - Jan 2023
- Contributed to the development of a full-stack solution for an e-commerce platform.
- Implemented features using React, Redux, Express, and MongoDB.
- Engaged in collaborative problem-solving and code reviews within a team environment.

BLOCKC SCHOOL, BANGALORE | Blockchain Engineering Fellow
Sep 2022 - Dec 2022
- Participated in a comprehensive program focused on blockchain development.
- Acquired skills in Solidity, Hardhat, Truffle, and Web3 for blockchain projects.
- Developed and deployed smart contracts on Ethereum and other blockchain platforms.

PROJECTS

A FULL-STACK SHOPPING SERVICE | E-commerce
Implemented a comprehensive full-stack shopping service using React, Redux, Express, and MongoDB.

AN API SERVICE TO FETCH USERS DATA | Cithub
Developed an service to fetch account details and repository, leveraging the github platform api. https://github.com/pathakvikash/E-waste-locator

E-WASTE-MANAGEMENT | E-waste-locator
This is college project. It was developed as part of the Smart India Hackathon (SIH) initiative and aims to raise awareness and promote responsible e-waste management.

ACHIEVEMENTS AND ACTIVITIES

Participated in SIH and many other hackthon
Active on programming sites -Leetcode, HackerRank, GFG
